OneVue Sense

Temperature and Humidity Sensor

Take the sweat out of temperature and humidity monitoring to create a safer, more comfortable environment for patients, staff, and visitors. These intelligent sensors feature enhanced Wi-Fi communication and authentication protocols that meet today’s stringent IT security policies and completely eliminate the need for manual monitoring and data logging. When paired with our cloud-based OneVue Monitor software, these sensors provide assurance that the temperature and humidity levels throughout your facility are kept within range to protect the comfort and safety of patients and staff.

More Functionality in a Sleek New Design

OneVue Sense Temperature and Humidity Sensors take automated indoor air quality monitoring to the next level. The addition of the latest Wi-Fi encryption protocols, secure network connections and flexible logging and reporting options ensure the security and integrity of your data transfers with minimal load on your IT network. Your monitoring data is captured seamlessly with OneVue Monitor, allowing you to maintain complete documentation, generate comprehensive reports and meet regulatory compliance requirements. When out-of-range conditions are detected, the sensor issues audible and visual alarms and immediately reports to OneVue Monitor to initiate an email, text or phone alert to the appropriate person.

Product Features:

• Audible and visual local alarms and email, text and/or phone alerts are initiated as soon as conditions stray out of custom-programmed ranges.
• LCD display shows temp/humidity readings and sensor diagnostics at the device.
• Available with two power options: Battery or AC with back-up batteries to protect data in case of power loss.
• FDA registered, 21 CFR Part 11 compliant.
