Analog Clocks

Slim Metal Series Analog Clocks

XR Series Analog Clocks utilize GPS and Network Time Protocol (NTP) to perfectly synchronize every clock throughout your facility to improve workflow, accountability and productivity. They synchronize seamlessly with your Primex 72MHz/GPS XR Series system using our proprietary 72MHz signal that transmits easily through common building materials and across longer distances with less potential for signal interference. XR analog clocks are available in a range of styles. Battery-powered or electric (AC) models are available.

SLIM METAL SERIES ANALOG CLOCKS

Contemporary brushed aluminum frames offer an upscale, executive look to our high-performance clocks. These high-tech synchronized clocks are easy-to-install and are easily incorporated into any décor.
