

Analog Clocks

Wood and Gallery Series Analog Clocks

Update your facility with perfectly synchronized time. The XR Series analog clocks utilize GPS and Network Time Protocol (NTP) to keep all your clocks in sync, even after Daylight Saving Time changes. They synchronize seamlessly with your Primex 72MHz/GPS XR Series system using our proprietary 72MHz signal that transmits easily through common building materials and across longer distances with less potential for signal interference. XR Series analog clocks are available in a range of styles.

WOOD SERIES ANALOG CLOCKS

High-tech accuracy is presented in a traditional look with the Wood Series Clocks. Ideal for offices, libraries, conference rooms and entry ways, the solid hardwood frame is available in a variety of finishes. Dial faces are available with Arabic numerals on ivory dials, or Roman numerals on antique dials.

WOOD SERIES		
Battery	AC	Description
